

# Zax ADA Braille Signs

## The Raster Method

For a clean, uniform look and feel that is easy to read and durable, this licensed and patented process press-fits perfectly round Braille beads into pre-drilled holes.

The result is attractive weather and vandal-resistant signage which meets ANSI and ADA requirements.

Rasters™ can be used in a variety of materials.

## Graphic Braille Grade II

These signs meet ADA requirements for standard rooms and spaces. Three sizes (8" x 8", 6" x 8", and 6" x 6") can contain standard or custom wording and are available in 20 color combinations (see page bottom)

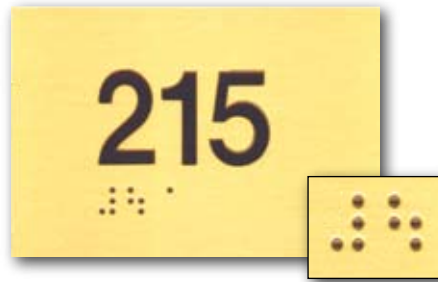

Graphics, lettering, and braille are raised 1/32" from surface. Order them framed or unframed. Choose character heights of 5/8" to 2", or for overhead signage 3" high. Optional radius corner frames come in 4 colors: Grey, Black, Almond and Brown.

## Custom Engraved Stone Products

Choose from 20 color combinations, 33 standard lengths (in 2", 4" & 6" heights), framed or unframed with custom wording to suit your specific needs.
