

Custom-Designed Exterior and Stone Signage

Architectural Stone Signage

A beautiful, durable and economical alternative to concrete.

This stately exterior signage system is among our new line of monument signs. Make a statement with these versatile, notable, and economical systems.

Standard models (such as the above) and custom designs are available. Options include UL-approved illuminated signs that stand out day or night!

Our specialty is custom-designed signage, developed and delivered with fast turnaround. Make your sign concept a reality quickly and with the utmost quality.

We offer a large variety of colors and textures. Unique FoamCore technology makes any size requirement feasible. Polyurethane coating protects your sign for years and years.

Due to the nature of our exterior signage, we must quote all orders to your specifications.

Architectural Exterior Signage

Non-illuminated signage for primary and secondary site identification, directional and informational applications.

Zax ES-100, All aluminum post and panel system with optional peak top.

Zax EZ Change Wordbar

The EZ Change Wordbar system allows multiple listings to be organized as individually stacked units—which can be easily changed and rearranged. A specially designed, two-part extruded mounting with removable fasteners allows for quick and easy adjustment regardless of the size and placement. Highly versatile! Aluminum system designed to carry two sides of copy and is comprised of wordbars and mounting posts of various styles and functions. Choose 2-1/4", 4", 6", 8", 10", 12", 15" or 18" high extrusions for endcap mounting.

Zax ES 1 - 12

Illuminated System

A 12" deep, heavy gauge, extruded aluminum cabinet-style frame with hinged face provides easy access to electrical components. This system features significant custom design flexibility for single and double faced signage. The 12" frame is ideal for large scale illuminated and non-illuminated signs with strong visual impact.

Zax ES 1 - 12

Slide Panel System
This changeable insert panel system can be routed and / or internally illuminated due to a newly designed extrusion. This has a 12" wide, heavy gauge, extruded aluminum cabinet style frame.

Zax ES P - 20S

Square Pylon System. An impressive system. Available in many sizes.
