

# Materials, Colors and Pricing

## Braille

Available colors are shown on page 3A. Made with two layers of plastic (1/16" and 1/32"). Pricing represents both layers combined.

### Braille Plastic Series and Material Price

**Series 302008:** 52¢ /sq. in.

## ADA Braille Requirements

On January 26, 1992, all commercial facilities (*\*which include any buildings that are open to the public*) must accommodate the special needs of individuals with disabilities by removing physical and communication barriers. Signs which designate permanent rooms and spaces shall have Raised and Braille characters. Facilities not in compliance are subject to fines and penalties as high as \$100,000 for not complying with ADA requirements.

## Specifications & Guidelines

### Sign Finish and Contrast

The colors selected for the characters and symbols on a sign should have a marked contrast to the background. The finish should be eggshell, matte, or a non-glare surface.

### Copy Specifications

Characters must be raised exactly 1/32" and must be accompanied by Grade II Braille.

### Character Heights

Tactile characters must be a minimum of 5/8" high - and no more than 2" high. Characters on overhead signs must be a minimum of 3" high. Characters on Directional and Informational signs must be sized to viewing distance.

### Type Styles

Characters must be in upper case (all caps) using a sans serif font (such as Helvetica Medium).

## Plastiflex

Flexible, tough, stain-resistant and easy to clean, Plastiflex is our standard sign material for interior wall signs and projecting signs.

Available in 1/16" and 1/8" thickness. Engraving can be done on both sides of the 1/8" thickness. For economy, use 1/16" thickness with standard letter styles (shown on page 5A).

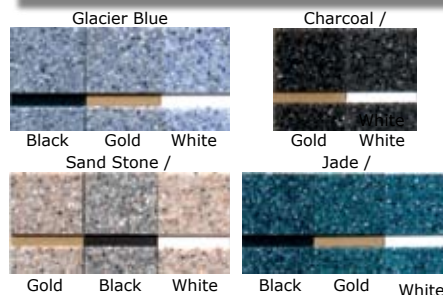

Color combinations such as black / white, white / black, and white / red are available in addition to those pictured above.

### Plastiflex Series Numbers & Material Price

**Series 302009:** 1/16" thickness, 36¢ / sq.in.

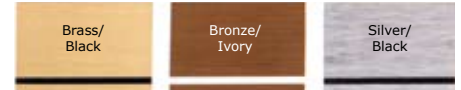

**Series 302010:** 1/8" thickness, 47¢ / sq. in.

## Granites

The classic finish of Granites Deluxe will compliment any interior or exterior signage. **Call for a custom quote!**

## Metalam

Metalam is a brush finish, metallic-like plastic which provides the rich look of metal at a more economical price.

Available in 3 colors, 1/16" thickness, one-sided only.

For projecting signs (see 11A), two layers of Metalam can be adhered back-to-back, as engraving is only possible on one side (double the material price).

### Metalam Series Numbers & Material Price

**Series 302014:** 1/16" thickness, 39¢ / sq. in.

## Subsurface Colors

Thirteen colors are available (additional colors are on page 17A) to create these weather, damage and vandal resistant signs which are engraved and color filled on the inside surface and well protected by a clear, acrylic outer surface.

See also Reverse Engraved signs, page 10A.

### Sub-Surface Series Numbers & Material Price

**Series 302015:** 3/32" thickness, 52¢ / sq. in.

## Brass (not illustrated)

ZAX ClassBrass™ is solid brass, satin finished, lacquer coated, and baked with contrasting black letters.

Available in two thicknesses - .025" & the stronger, warp-resistant .050".

### Brass Series Numbers and Material Price

**Series 302018:** .025" thickness, 70¢ / sq. in.

**Series 302019:** .050" thickness, 97¢ / sq. in.
