

Changeable Insert Signs

Changeable Insert Signs

For Frequent Changing of Information

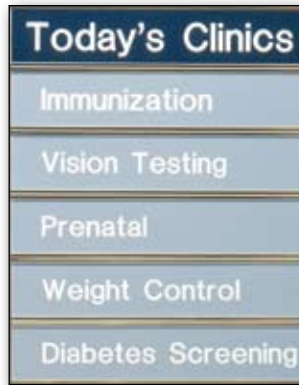

Changeable Insert Signs are an easy, economical, and flexible way to display and adjust signs that need to be updated on occasion as people and spaces are re-assigned. Attractive sign holders in 8 sizes have Anodized Silver or Gold finish. Inserts are available in Plastiflex or Metalam. Prices include up to 18 characters per sign.

10. Opt. Screw Holes

Projecting Signs

Projecting signs are the most effective style signage along a hallway or corridor.

Four type styles can be engraved on one or both sides. Choose from two series - **Standard or Architectural:**

- Standard series features 'Normal' type style and has exposed bracket screws.

** See Radiology Photo

- Architectural Series uses Clarendon, Helvetica and Optima type styles and bracket screws are not visible.

** See Administrative Office Photo

Inserts can be made of Plastiflex or Metalam. Inserts must be 1/8" thick, therefore thinner materials must be laminated together.

**Also available in gold tone and silver tone.

Lettering is standard 1" high.
